No securities dealer, sales representative, or any other person has been authorized to give any information or to make any representations, other than those contained in this Prospectus or in approved sales literature in connection with the offer contained herein, and if given or made, such other information or representations must not be relied upon as having been authorized by the M.S. Sass Concentrated Value ETF or The RBB Fund Trust. This Prospectus does not constitute an offer to sell or a solicitation of an offer to buy any of the securities offered hereby in any jurisdiction or to any person to whom it is unlawful to make such offer.

M.D. Sass Concentrated Value ETF

SUMMARY SECTION

Investment Objective

The M.D. Sass Concentrated Value ETF (the “Fund”) seeks long-term capital appreciation.

Fees and Expenses

This table describes the fees and expenses that you may pay if you buy, hold, and sell shares of the Fund (“Shares”). **This table and the Example below do not include the brokerage commissions that investors may pay on their purchases and sales of Shares.**

Annual Fund Operating Expenses (expenses that you pay each year as a percentage of the value of your investment):

Management Fees	0.75%
Distribution (12b-1) Fees	0.00%
Other Expenses ⁽¹⁾	0.00%
Total Annual Fund Operating Expenses	0.75%

⁽¹⁾ “Other Expenses” are estimated for the current fiscal year.

Example

This Example is intended to help you compare the cost of investing in the Fund with the cost of investing in other funds. The Example assumes that you invest \$10,000 in the Fund for the time periods indicated and then hold or redeem all of your Shares at the end of those periods. The Example also assumes that: (1) your investment has a 5% return each year, and (2) the Fund’s operating expenses remain the same. Although your actual costs may be higher or lower, based on these assumptions your costs would be:

<u>1 Year</u>	<u>3 Years</u>
\$77	\$240

Portfolio Turnover

The Fund pays transaction costs, such as commissions, when it buys and sells securities (or “turns over” its portfolio). A higher portfolio turnover rate may indicate higher transaction costs and may result in higher taxes when Shares are held in a taxable account. These costs, which are not reflected in annual fund operating expenses or in the Example, affect the Fund’s performance. No portfolio turnover rate is provided for the Fund because the Fund had not commenced operations prior to the date of this Prospectus.

Principal Investment Strategies

The Fund is an actively-managed exchange-traded fund (“ETF”) that follows a high conviction, opportunistic U.S. equity strategy. The Fund pursues its investment objective by investing at least 80% of its net assets (plus borrowings for investment purposes) in common stocks and American Depositary Receipts (“ADRs”) of value companies (the “80% Policy”). The Fund defines value companies as companies that are included in the Russell 1000® Value Index or the Russell 3000® Value Index. The Fund primarily invests in the U.S. exchange-listed equity securities of large-capitalization and mid-capitalization value companies that are considered by M.D. Sass, LLC (the “Adviser”) to be out-of-favor and/or misunderstood relative to the market. For purposes of calculating the 80% Policy, cash and cash equivalents are excluded from the Fund’s total assets.

The Adviser’s investment process begins with intensive, bottoms-up fundamental research used to validate its investment thesis on a given situation, build conviction and quantify the disconnect between market consensus and our own view. The Adviser seeks to identify businesses with favorable fundamentals, strong financial quality, and forecastable earnings. The investment process favors companies that are undergoing positive fundamental change, are out of favor, and/or special situations, such as spin offs, transformative M&A and complex companies with a path to simplification. The Adviser seeks to identify stocks where 1) it has a differentiated view versus the market consensus; 2) it believes there is a favorable reward/risk ratio; and 3) it expects an attractive internal rate of return over a multi-year period.

The Adviser’s research process includes, but is not limited to: reviewing SEC filings (10-Ks, 10-Qs, and proxies); analyzing earnings calls and conference transcripts; leveraging third-party research such as trade publications, expert network transcripts, and sell-side reports; engaging with industry stakeholders—including former employees, customers, suppliers, competitors, and management; building detailed financial models focused on key value drivers; assessing consensus expectations and market sentiment reflected in share prices; and conducting disciplined valuation reviews to quantify risk and reward.

For new investments, the Adviser assesses probability-weighted returns and qualitative factor scores in determining optimal position sizes, removing the emotional element that may lead to suboptimal sizing decisions. The Fund will generally hold up to 25 stocks at any given time, as the Adviser believes a concentrated portfolio of stocks it understands well will provide greater risk-adjusted returns over time. As part of a broader risk management program, the Fund generally limits any individual position size to 8% of its total assets.

The Fund typically sells an investment when either: 1) the Adviser's view on earnings is no longer markedly different than consensus; or 2) valuation has become unreasonable in the opinion of the Adviser. The Adviser conducts a "post-mortem" analysis for every stock after it is sold to understand what was done right/wrong, how much of the outcome was driven by skill versus luck, and how the Adviser can utilize lessons learned to fine tune its investment and research processes moving forward.

The Fund is "non-diversified" for purposes of the Investment Company Act of 1940, as amended, (the "1940 Act") which means that the Fund may invest in fewer securities at any one time than a diversified fund.

The Adviser has retained Tidal Investments LLC (the "Sub-Adviser"), which is responsible for trading portfolio securities for the Fund, including selecting broker-dealers to execute purchase and sale transactions or in connection with any rebalancing of the Fund.

The Fund intends to elect to be, and intends to qualify each year for treatment as, a regulated investment company ("RIC") under Subchapter M of Subtitle A, Chapter 1, of the Internal Revenue Code of 1986, as amended (the "Code").

Principal Investment Risks

Loss of money is a risk of investing in the Fund. The value of your investment in the Fund, as well as the amount of return you receive on your investment, may fluctuate significantly from day to day and over time. You may lose part or all of your investment in the Fund or your investment may not perform as well as other similar investments. The Fund's principal risks are presented in alphabetical order to facilitate finding particular risks and comparing them with other funds. Each risk summarized below is considered a "principal risk" of investing in the Fund, regardless of the order in which it appears. Different risks may be more significant at different times depending on market conditions or other factors.

- **Active Management Risk.** The Fund is subject to management risk as an actively-managed investment portfolio. The Adviser's investment approach may fail to produce the intended result.
- **American Depositary Receipts Risk.** ADRs may be subject to some of the same risks as direct investment in foreign companies, which includes international trade, currency, political, regulatory and diplomatic risks. In a sponsored ADR arrangement, the foreign issuer assumes the obligation to pay some or all of the depositary's transaction fees. Under an unsponsored ADR arrangement, the foreign issuer assumes no obligations and the depositary's transaction fees are paid directly by the ADR holders. Because unsponsored ADR arrangements are organized independently and without the cooperation of the issuer of the underlying securities, available information concerning the foreign issuer may not be as current as for sponsored ADRs and voting rights with respect to the deposited securities are not passed through.
- **Common Stock Risk.** Investments in common stocks are subject to market, economic and business risks that will cause their price to fluctuate over time. Therefore, an investment in the Fund may be more suitable for long-term investors who can bear the risk of these fluctuations.
- **Cyber Security Risk.** Cyber security risk is the risk of an unauthorized breach and access to Fund assets, Fund or customer data (including private shareholder information), or proprietary information, or the risk of an incident occurring that causes the Fund, the Adviser, the Sub-Adviser, custodian, transfer agent, distributor and other service providers and financial intermediaries to suffer data breaches, data corruption or lose operational functionality or prevent Fund investors from purchasing, redeeming or exchanging shares or receiving distributions. The use of artificial intelligence and machine learning could exacerbate these risks. The Fund and the Adviser have limited ability to prevent or mitigate cyber security incidents affecting third-party service providers and such third-party service providers may have limited indemnification obligations to the Fund or the Adviser. Successful cyber-attacks or other cyber-failures or events affecting the Fund or its service providers may adversely impact and cause financial losses to the Fund or its shareholders. Issuers of securities in which the Fund invests are also subject to cyber security risks, and the value of these securities could decline if the issuers experience cyber-attacks or other cyber-failures.
- **Equity Markets Risk.** The equity securities held in the Fund's portfolio may experience sudden, unpredictable drops in value or long periods of decline in value. This may occur because of factors that affect securities markets generally or factors affecting specific issuers, industries, or sectors in which the Fund invests. Common stocks are generally exposed to greater risk than other types of securities, such as preferred stocks and debt obligations, because common stockholders generally have inferior rights to receive payment from issuers.

- **ETF Risk.** The Fund is an ETF, and, as a result of an ETF’s structure, it is exposed to the following risks: “Authorized Participants, Market Makers and Liquidity Providers Concentration Risk,” “Cash Transactions Risk,” “Secondary Market Trading Risk,” and “Shares May Trade at Prices Other Than NAV Risk.”
 - *Authorized Participants, Market Makers and Liquidity Providers Concentration Risk.* Only an authorized participant (“AP”) may engage in creation or redemption transactions directly with the Fund. The Fund has a limited number of financial institutions that are institutional investors and may act as APs. In addition, there may be a limited number of market makers and/or liquidity providers in the marketplace. To the extent either of the following events occur, Shares may trade at a material discount to net asset value (“NAV”) and possibly face delisting: (i) APs exit the business or otherwise become unable to process creation and/or redemption orders and no other APs step forward to perform these services, or (ii) market makers and/or liquidity providers exit the business or significantly reduce their business activities and no other entities step forward to perform their functions. These events, among others, may lead to the Shares trading at a premium or discount to NAV. Thus, you may pay more (or less) than the NAV when you buy Shares in the secondary market, and you may receive less (or more) than NAV when you sell those Shares in the secondary market. A diminished market for an ETF’s shares substantially increases the risk that a shareholder may pay considerably more or receive significantly less than the underlying value of the ETF shares bought or sold. In periods of market volatility, APs, market makers and/or liquidity providers may be less willing to transact in Shares.
 - *Secondary Market Trading Risk.* Although Shares are listed on a national securities exchange, NYSE Arca, Inc. (the “Exchange”), and may be traded on U.S. exchanges other than the Exchange, there can be no assurance that an active or liquid trading market for them will develop or be maintained. In addition, trading in Shares on the Exchange may be halted. Trading may be halted because of market conditions or for reasons that, in the view of the Exchange, make trading in the Fund inadvisable. These may include: (a) the extent to which trading is not occurring in the securities and/or the financial instruments composing the Fund’s Portfolio; or (b) whether other unusual conditions or circumstances detrimental to the maintenance of a fair and orderly market are present. During periods of market stress, there may be times when the market price of Shares is more than the NAV intra-day (premium) or less than the NAV intra-day (discount). This risk is heightened in times of market volatility or periods of steep market declines.
 - *Shares May Trade at Prices Other Than NAV Risk.* As with all ETFs, Shares may be bought and sold in the secondary market at market prices. Although it is expected that the market price of Shares will approximate the Fund’s NAV, there may be times when the market price of Shares is more than the NAV intra-day (premium) or less than the NAV intra-day (discount). This risk is heightened in times of market volatility or periods of steep market declines.
- **Focused Investment Risk.** If the Fund focuses its investments in the securities of a particular issuer or companies in a particular country, group of countries, region, market, industry, group of industries, sector or asset class, the Fund’s exposure to various risks will be heightened, including price volatility and adverse economic, market, political or regulatory occurrences affecting that issuer, country, group of countries region, market, industry, group of industries, sector or asset class.
- **Inflation and Deflation Risk.** Inflation risk is the risk that the value of assets or income from investments will be worth less in the future as inflation decreases the value of money. As inflation increases, the real value of the Fund’s shares and any distributions thereon may decline. Inflation rates may change frequently and significantly as a result of various factors, including unexpected shifts in the domestic or global economy and changes in economic policies, and the Fund’s investments may not keep pace with inflation, which may result in losses to the Fund’s shareholders. Deflation risk is the risk that the prices of goods and services in the U.S. and many foreign economies may decline over time. Deflation may have an adverse effect on stock prices and the creditworthiness of issuers and may make defaults on debt more likely. If a country’s economy slips into a deflationary pattern, it could last for a prolonged period and be difficult to reverse.
- **Large-Cap Companies Risk.** Larger, more established companies may be unable to respond quickly to new competitive challenges such as changes in consumer tastes or innovative smaller competitors. Also, large-cap companies are sometimes unable to attain the high growth rates of successful, smaller companies, especially during extended periods of economic expansion.
- **Large Shareholder Risk.** Certain large shareholders, including APs, may from time to time own a substantial amount of the Fund’s shares. There is no requirement that these shareholders maintain their investment in the Fund. There is a risk that such large shareholders or that the Fund’s shareholders generally may redeem all or a substantial portion of their investments in the Fund in a short period of time, which could have a significant negative impact on the Fund’s NAV, liquidity, and brokerage costs. Large redemptions could also impact the Fund’s ability to implement its investment strategy.

- **Market Risk.** The NAV of the Fund will change with changes in the market value of its portfolio positions. Investors may lose money. The value of investments held by the Fund may increase or decrease in response to economic, political, financial, public health crises (such as epidemics or pandemics) or other disruptive events (whether real, expected or perceived) in the U.S. and global markets. Rapid changes in prices or liquidity, which often are not anticipated and can relate to events not connected to particular investments, may limit the ability of the Fund to dispose of its assets at the price or time of its choosing and can result in losses. Changes in prices may be temporary or may last for extended periods.
- **Mid-Cap Companies Risk.** Mid-cap companies may not have the management experience, financial resources, product diversification and competitive strengths of large-cap companies and, therefore, their securities tend to be more volatile than the securities of larger, more established companies, making them less liquid than other securities.
- **New Fund Risk.** The Fund is a newly organized, management investment company with no operating history. In addition, there can be no assurance that the Fund will grow to, or maintain, an economically viable size, in which case the Board of the Trust may determine to liquidate the Fund.
- **Non-Diversification Risk:** The Fund is non-diversified. Compared to other funds, the Fund may invest more of its assets in a smaller number of companies. Gains or losses on a single stock may have greater impact on the Fund.
- **Special Situations Risk.** The Fund will seek to benefit from Special Situations, such as mergers, reorganizations, or other unusual events expected to affect a particular issuer. There is a risk that the Special Situation might not occur or involve longer time frames than originally expected, which could have a negative impact on the price of the issuer's securities and fail to produce gains or produce a loss for the Fund.
- **Value Investment Risk.** Value stocks may perform differently from the market as a whole and an investment strategy purchasing these securities may cause the Fund to at times underperform equity funds that use other investment strategies. Value stocks can react differently to political, economic, and industry developments than the market as a whole and other types of stocks. Value stocks also may underperform the market for long periods of time.

Performance

Performance information for the Fund is not included because the Fund had not commenced operations prior to the date of this Prospectus. Performance information will be available in the Prospectus once the Fund has at least one calendar year of performance. The Fund's past performance, before and after taxes, is not necessarily an indication of how the Fund will perform in the future and does not guarantee future results. Updated performance information will be available on the Fund's website at www.MDSassETF.com.

Management of the Fund

Investment Adviser

M.D. Sass, LLC

Eric Ward	Senior Equity Analyst	Since Inception
Shimeng Yu	Senior Equity Analyst	Since Inception

Purchase and Sale of Fund Shares

Shares are listed on a national securities exchange, the Exchange, and investors can only buy and sell Shares through brokers or dealers at market prices, rather than NAV. Because Shares trade at market prices rather than NAV, Shares may trade at a price greater than NAV (premium) or less than NAV (discount). An investor may incur costs attributable to the difference between the highest price a buyer is willing to pay to purchase shares (bid) and the lowest price a seller is willing to accept for shares (ask) when buying or selling shares in the secondary market (the “bid-ask spread”). The median bid-ask spread for the Fund’s most recent fiscal year cannot be provided because the Fund did not have a trading history to report trading information and related costs prior to the date of this Prospectus. Once available, information on the Fund’s NAV, market price, premiums and discounts, and bid-ask spreads will be provided at www.MDSassETF.com.

The Fund issues and redeems Shares at NAV only in large blocks known as “Creation Units,” which only APs (typically, broker-dealers) may purchase or redeem. Creation Units generally consist of at least 5,000 Shares, though this may change from time to time. The Fund generally issues and redeems Creation Units in exchange for a portfolio of securities closely approximating the holdings of the Fund (the “Deposit Securities”) and/or a designated amount of U.S. cash.

Tax Information

Fund distributions are generally taxable as ordinary income, qualified dividend income, or capital gains (or a combination), unless your investment is made through an individual retirement account (“IRA”) or other tax-advantaged account. Distributions on investments made through tax-deferred arrangements may be taxed later upon withdrawal of assets from those accounts.

Financial Intermediary Compensation

If you purchase Shares through a broker-dealer or other financial intermediary (such as a bank) (an “Intermediary”), the Fund’s investment adviser, or its affiliates may pay Intermediaries for certain activities related to the Fund, including participation in activities that are designed to make Intermediaries more knowledgeable about exchange traded products, including the Fund, or for other activities, such as marketing, educational training or other initiatives related to the sale or promotion of Shares. These payments may create a conflict of interest by influencing the Intermediary and your salesperson to recommend the Fund over another investment. Any such arrangements do not result in increased Fund expenses. Ask your salesperson or visit the Intermediary’s website for more information.

ADDITIONAL INFORMATION ABOUT THE FUND

Investment Objective

The Fund’s investment objective has been adopted as a non-fundamental investment policy and may be changed without shareholder approval upon 60 days’ written notice to shareholders.

The Fund must comply with its 80% Policy at the time the Fund invests its assets. Accordingly, when the Fund no longer meets the 80% requirement as a result of circumstances beyond its control, such as changes in the value of portfolio holdings, the Fund would not have to sell its holdings, but any new investments it makes would need to be consistent with its 80% Policy.

Portfolio Composition

The Fund has a policy to invest, under normal market conditions, at least 80% of its net assets (plus the amount of any borrowings for investment purposes) in common stocks and ADRs of value companies. The 80% Policy is non-fundamental and may be changed without shareholder approval upon 60 days’ prior notice to shareholders.

Additional Information About the Fund’s Principal Investments and Risks

The value of the Fund’s investments may decrease, which will cause the value of the Fund’s Shares to decrease. As a result, you may lose money on your investment in the Fund, and there can be no assurance that the Fund will achieve its investment objective. An investment in the Fund is subject to one or more of the principal risks:

Active Management Risk. The Adviser actively manages the Fund’s investments. Consequently, the Fund is subject to the risk that the investment techniques and risk analyses employed by the Adviser may not produce the desired results. This could cause the Fund to lose value or its investment results to lag relevant benchmarks or other funds with similar objectives. Additionally, legislative, regulatory or tax developments may affect the investment techniques available to the Adviser in connection with managing the Fund and may also adversely affect the ability of the Fund to achieve its investment goal.

American Depositary Receipts Risk. ADRs may be subject to some of the same risks as direct investment in foreign companies, which includes international trade, currency, political, regulatory and diplomatic risks. In a sponsored ADR arrangement, the foreign issuer assumes the obligation to pay some or all of the depositary’s transaction fees. Under an unsponsored ADR arrangement, the foreign issuer assumes no obligations and the depositary’s transaction fees are paid directly by the ADR holders. Because unsponsored ADR arrangements are organized independently and without the cooperation of the issuer of the underlying securities, available information concerning the foreign issuer may not be as current as for sponsored ADRs and voting rights with respect to the deposited securities are not passed through.

Common Stock Risk. Common stocks in which the Fund may invest are subject to market, economic and business risks that will cause their price to fluctuate over time. Historically, the equity markets have moved in cycles, and the value of the Fund's equity securities may fluctuate drastically from day to day. Individual companies may report poor results or be negatively affected by industry and/or economic trends and developments. The prices of securities issued by such companies may suffer a decline in response. These factors contribute to price volatility. An investment in the Fund may be more suitable for long-term investors who can bear the risk of these fluctuations. In the event an issuer is liquidated or declares bankruptcy, the claims of owners of bonds and preferred stock take precedence over the claims of those who own common stock.

Cyber Security Risk. With the increased use of technologies such as the internet to conduct business, the Fund is susceptible to operational, information security and related risks. In general, cyber incidents can result from deliberate attacks or unintentional events. Cyber-attacks include, but are not limited to, gaining unauthorized access to digital systems (e.g., through "hacking" or malicious software coding) for purposes of misappropriating assets or sensitive information, corrupting data, or causing operational disruption. Cyber-attacks may also be carried out in a manner that does not require gaining unauthorized access, such as causing denial-of-service attacks on websites (i.e., efforts to make network services unavailable to intended users). Cyber security failures or breaches by the Fund's adviser and other service providers (including, but not limited to, the Fund's accountant, custodian, transfer agent and administrator), and the issuers of securities in which the Fund invests, have the ability to cause disruptions and impact business operations, potentially resulting in financial losses, interference with the Fund's ability to calculate its NAV, impediments to trading, the inability of Fund shareholders to transact business, violations of applicable privacy and other laws, regulatory fines, penalties, reputational damage, reimbursement or other compensation costs, or additional compliance costs. The use of artificial intelligence and machine learning could exacerbate these risks or result in cyber security incidents that implicate personal data. The use of artificial intelligence and machine learning could exacerbate these risks or result in cyber security incidents that implicate personal data. In addition, substantial costs may be incurred in order to prevent any cyber incidents in the future. While the Adviser has established business continuity plans in the event of, and risk management systems to prevent, such cyber-attacks, there are inherent limitations in such plans and systems including the possibility that certain risks have not been identified. Furthermore, the Fund cannot control the cyber security plans and systems put in place by service providers to the Fund, and issuers in which the Fund invests, and such third-party service providers may have limited indemnification obligations to the Fund, the Adviser, or the Sub-Adviser. The Fund and its shareholders could be negatively impacted as a result. Issuers of securities in which the Fund invests are also subject to cyber security risks, and the value of these securities could decline if the issuers experience cyber-attacks or other cyber-failures.

Equity Markets Risk. The price of equity securities may rise or fall because of changes in the broad market or changes in a company's financial condition, sometimes rapidly or unpredictably. These price movements may result from factors affecting individual companies, sectors or industries selected for the Fund or the securities market as a whole, such as changes in economic or political conditions. Equity securities are subject to "stock market risk" meaning that stock prices in general (or in particular, the types of securities in which the Fund invests) may decline over short or extended periods of time. When the value of the Fund's securities goes down, your investment in the Fund decreases in value. Common stocks are generally exposed to greater risk than other types of securities, such as preferred stock and debt obligations, because common stockholders generally have inferior rights to receive payment from issuers. Common stocks are susceptible to general stock market fluctuations and to volatile increases and decreases in value as market confidence and perceptions of their issuers change. These investor perceptions are based on various and unpredictable factors including: expectations regarding government, economic, monetary and fiscal policies; inflation and interest rates; economic expansion or contraction; and global or regional political, economic, and banking crises.

ETF Risk. The Fund is an ETF, and, as a result of an ETF's structure, the Fund is exposed to the following risks:

Authorized Participants, Market Makers and Liquidity Providers Concentration Risk. Only an AP may engage in creation or redemption transactions directly with the Fund. The Fund may have a limited number of financial institutions that may act as APs. In addition, there may be a limited number of market makers and/or liquidity providers in the marketplace. To the extent either of the following events occur, Shares may trade at a material discount to NAV and possibly face delisting: (i) APs exit the business or otherwise become unable to process creation and/or redemption orders and no other APs step forward to perform these services, or (ii) market makers and/or liquidity providers exit the business or significantly reduce their business activities and no other entities step forward to perform their functions. These events, among others, may lead to the Shares trading at a premium or discount to NAV. Thus, you may pay more (or less) than the NAV when you buy Shares in the secondary market, and you may receive less (or more) than NAV when you sell those Shares in the secondary market. A diminished market for an ETF's shares substantially increases the risk that a shareholder may pay considerably more or receive significantly less than the underlying value of the ETF shares bought or sold. In periods of market volatility, APs, market makers and/or liquidity providers may be less willing to transact in Fund Shares.

Secondary Market Trading Risk. Although the Fund's Shares are listed for trading on the Exchange and may be listed or traded on U.S. and non-U.S. stock exchanges other than the Exchange, there can be no assurance that an active trading market for Shares will develop or be maintained. Trading in the Fund's Shares may be halted due to market conditions or for reasons that, in the view of the Exchange, make trading in Shares inadvisable. In addition, trading in Shares on the Exchange is subject to trading halts caused by extraordinary market volatility pursuant to Exchange "circuit breaker" rules, which temporarily halt trading on the Exchange. Additional rules applicable to the Exchange may halt trading in Shares when extraordinary volatility causes sudden, significant swings in the market price of Shares. There can be no assurance that Shares will trade with any volume, or at all, on any stock exchange. In stressed market conditions, the liquidity of the Fund's Shares may begin to mirror the liquidity of the Fund's underlying holdings, which can be significantly less liquid than the Fund's Shares. In addition, during periods of market stress, there may be times when the market price of Shares is more than the NAV intra-day (premium) or less than the NAV intra-day (discount). This risk is heightened in times of market volatility or periods of steep market declines.

Shares May Trade at Prices Other Than NAV Risk. As with all ETFs, Shares of the Fund may be bought and sold in the secondary market at market prices. Although it is expected that the market price of Shares will approximate the Fund's NAV, there may be times when the market price of Shares is more than the NAV intra-day (premium) or less than the NAV intra-day (discount) due to supply and demand of Shares or during periods of market volatility. This risk is heightened in times of market volatility or periods of steep market declines. The market price of Shares during the trading day, like the price of any exchange-traded security, includes a "bid/ask" spread charged by the exchange specialist, market makers or other participants that trade Shares. In times of severe market disruption, the bid/ask spread can increase significantly. At those times, Shares are most likely to be traded at a discount to NAV, and the discount is likely to be greatest when the price of Shares is falling fastest, which may be the time that you most want to sell your Shares. The Adviser believes that, under normal market conditions, large market price discounts or premiums to NAV will not be sustained because of arbitrage opportunities.

Focused Investment Risk. If the Fund focuses its investments in the securities of a particular issuer or companies in a particular country, group of countries, region, market, industry, group of industries, sector or asset class, the Fund's exposure to various risks will be heightened, including price volatility and adverse economic, market, political or regulatory occurrences affecting that issuer, country, group of countries region, market, industry, group of industries, sector or asset class.

Inflation and Deflation Risk. Inflation risk is the risk that the value of assets or income from investments will be worth less in the future as inflation decreases the value of money. As inflation increases, the real value of the Fund's shares and any distributions thereon may decline. Inflation rates may change frequently and significantly as a result of various factors, including unexpected shifts in the domestic or global economy and changes in economic policies, and the Fund's investments may not keep pace with inflation, which may result in losses to the Fund's shareholders. While inflation and/or a more normalized interest rate environment relative to the past decade may create more opportunities for a value focused investment strategy, there can be no guarantee or certainty that any such opportunities will be captured or will be realized. Deflation risk is the risk that the prices of goods and services in the U.S. and many foreign economies may decline over time. Deflation may have an adverse effect on stock prices and the creditworthiness of issuers and may make defaults on debt more likely. If a country's economy slips into a deflationary pattern, it could last for a prolonged period and be difficult to reverse.

Large-Cap Companies Risk. Larger, more established companies may be unable to respond quickly to new competitive challenges such as changes in consumer tastes or innovative smaller competitors. Also, large-cap companies are sometimes unable to attain the high growth rates of successful, smaller companies, especially during extended periods of economic expansion.

Large Shareholder Risk. Certain large shareholders, including APs, may from time to time own a substantial amount of the Fund's shares. There is no requirement that these shareholders maintain their investment in the Fund. There is a risk that such large shareholders or that the Fund's shareholders generally may redeem all or a substantial portion of their investments in the Fund in a short period of time, which could have a significant negative impact on the Fund's NAV, liquidity, and brokerage costs. Large redemptions could also impact the Fund's ability to implement its investment strategy. The Fund's ability to pursue its investment objective after one or more large scale redemptions may be impaired and, as a result, the Fund may invest a larger portion of its assets in cash or cash equivalents.

Market Risk. The NAV of the Fund will change with changes in the market value of its portfolio positions. Investors may lose money. Although the Fund will invest in companies that the Adviser believes will produce less volatility, there is no guarantee that the companies will perform as expected. The prices of securities held by the Fund may decline in response to conditions affecting the general economy, overall market changes, local, regional or global political, social or economic instability, and currency, interest rate and commodity price fluctuations.

Periods of unusually high financial market volatility and restrictive credit conditions, at times limited to a particular sector or geographic area, have occurred in the past and may be expected to recur in the future. Some countries, including the United States, have adopted or have signaled protectionist trade measures, relaxation of the financial industry regulations that followed the financial crisis, and/or reductions to corporate taxes. The scope of these policy changes is still developing, but the equity and debt markets may react strongly to expectations of change, which could increase volatility, particularly if a resulting policy runs counter to the market's expectations. The outcome of such changes cannot be foreseen at the present time. In addition, geopolitical and other risks, including environmental and public health risks, may add to instability in the world economy and markets generally. As a result of increasingly interconnected global economies and financial markets, the value and liquidity of the Fund's investments may be negatively affected by events impacting a country or region, regardless of whether the Fund invests in issuers located in or with significant exposure to such country or region.

The current presidential administration has called for and is seeking to quickly enact significant changes to U.S. fiscal, tax, trade, healthcare, immigration, foreign, and government regulatory policy. Significant uncertainty exists with respect to legislation, regulation and government policy at the federal level, as well as the state and local levels. Recent events have created a climate of heightened uncertainty and introduced new and difficult-to-quantify macroeconomic and political risks with potentially far-reaching implications. There has been a corresponding meaningful increase in the uncertainty surrounding interest rates, inflation, foreign exchange rates, trade volumes and fiscal and monetary policy. To the extent the U.S. Congress or the current presidential administration implements changes to U.S. policy, those changes may impact, among other things, the U.S. and global economy, international trade and relations, unemployment, immigration, corporate taxes, healthcare, the U.S. regulatory environment, inflation and other areas. Although the Fund cannot predict the impact, if any, of these changes to the Fund's business, they could adversely affect the Fund's business, financial condition, operating results and cash flows. Until the Fund knows what policy changes are made and how those changes impact the Fund's business and the business of the Fund's competitors over the long term, the Fund will not know if, overall, the Fund will benefit from them or be negatively affected by them.

Advancements in technology may also adversely impact markets and the overall performance of the Fund. For instance, the economy may be significantly impacted by the advanced development and increased regulation of artificial intelligence. As the use of technology grows, liquidity and market movements may be affected. As artificial intelligence is used more widely, the profitability and growth of Fund holdings may be impacted, which could significantly impact the overall performance of the Fund.

Mid-Cap Companies Risk. Generally, mid-cap companies may have more potential for growth than companies with larger market capitalizations. Investing in mid-cap companies, however, may involve greater risk than investing in large-cap companies. Mid-cap companies may not have the management experience, financial resources, product diversification and competitive strengths of large-cap companies. Therefore, their securities may be more volatile than the securities of larger, more established companies, making them less liquid than other securities. Mid-cap company stocks may also be bought and sold less often and in smaller amounts than larger company stocks. Because of this, if the Fund wants to sell a large quantity of a mid-cap company's stock, it may have to sell at a lower price than it might prefer, or it may have to sell in smaller than desired quantities over a period of time.

New Fund Risk. There can be no assurance that a newly organized Fund with no operating history will grow to, or maintain, an economically viable size, in which case the Board may determine to liquidate the Fund. Liquidation can be initiated without shareholder approval by the Board if it determines it is in the best interest of shareholders. As a result, the timing of any liquidation may not be favorable to certain individual shareholders. Like other new funds, large inflows and outflows may impact the Fund's market exposure for limited periods of time. This impact may be positive or negative, depending on the direction of market movement during the period affected. If the Fund fails to attract a large amount of assets, shareholders of the Fund may incur higher expenses as the Fund's fixed costs would be allocated over a smaller number of shareholders.

Non-Diversification Risk. The Fund is non-diversified. Compared to other funds, the Fund may invest more of its assets in a smaller number of companies. Gains or losses on a single stock may have greater impact on the Fund.

Special Situations Risk. The Fund will seek to benefit from Special Situations, such as mergers, reorganizations, or other unusual events expected to affect a particular issuer. The term Special Situation shall be deemed to refer to a security of a company in which an unusual and possibly non-repetitive development is taking place which, in the opinion of the Adviser, may cause the security to attain a higher market value independently, to a degree, than the trend in the securities market in general.

The particular development (actual or prospective), which may qualify a security as a Special Situation, may be one of many different types. Such developments may include, among others, a technological improvement or important discovery or acquisition which, if the expectation for it materialized, would effect a substantial change in the company's business; a reorganization; a recapitalization or other development involving a security exchange or conversion; a merger, liquidation or distribution of cash, securities or other assets; a breakup or workout of a holding company; litigation which, if resolved favorably, would improve the value of the company's stock; a new or changed management; or material changes in management policies. A Special Situation may often involve a comparatively small company, which is not well known, and which has not been closely watched by investors generally, but it may also involve a large company. The fact, if it exists, that an increase in the company's earnings, dividends or business is expected, or that a given security is considered to be undervalued, would not in itself be sufficient to qualify as a Special Situation. The Fund may invest in securities (even if not Special Situations) which, in the opinion of the Adviser, are appropriate investments for the Fund, including securities which the Adviser believes are undervalued by the market. There is a risk that the Special Situation might not occur or involve longer time frames than originally expected, which could have a negative impact on the price of the issuer's securities and fail to produce gains or produce a loss for the Fund.

Value Investment Risk. Value stocks may perform differently from the market as a whole and an investment strategy purchasing these securities may cause the Fund to at times underperform equity funds that use other investment strategies. Value stocks can react differently to political, economic, and industry developments than the market as a whole and other types of stocks. Value stocks also may underperform the market for long periods of time. The determination that a stock is undervalued is subjective; the market may not agree, and a stock's price may not rise to what the Adviser believes is its full value. If the market does not consider the stock to be undervalued then the value of the Fund's Shares may decline, even if stock prices generally are rising. The Fund may make other types of investments and may engage in various other investment practices. These investments and practices, and their risks, are described in the Fund's Statement of Additional Information ("SAI").

Additional Information About Non-Principal Risks of the Fund

This section provides additional information regarding certain non-principal risks of investing in the Fund. The risk listed below could have a negative impact on the Fund's performance and trading prices.

Artificial Intelligence. Advancements in technology may also adversely impact markets and the overall performance of the Fund. For instance, the economy may be significantly impacted by the advanced development and increased regulation of artificial intelligence. As the use of technology grows, liquidity and market movements may be affected. As artificial intelligence is used more widely, the profitability and growth of the Fund's holdings may be impacted, which could significantly impact the overall performance of the Fund.

Authorized Participant Concentration Risk. Only APs may engage in creation or redemption transactions directly with the Fund. The Fund has a limited number of institutions that may act as APs and such APs have no obligation to submit creation or redemption orders. Consequently, there is no assurance that APs will establish or maintain an active trading market for the Fund's Shares. In addition, to the extent that APs exit the business or are unable to proceed with creation and/or redemption orders with respect to the Fund and no other AP is able to step forward to create or redeem Creation Units, this may result in a significantly diminished trading market for Shares, and Shares may be more likely to trade at a premium or discount to the Fund's NAV and to face trading halts and/or delisting.

Costs of Buying or Selling Shares Risk. Investors buying or selling Shares in the secondary market will pay brokerage commissions or other charges imposed by brokers, as determined by that broker. Brokerage commissions are often a fixed amount and may be a significant proportional cost for investors seeking to buy or sell relatively small amounts of the Fund's Shares. In addition, secondary market investors will also incur the cost of the difference between the price at which an investor is willing to buy Shares (the "bid" price) and the price at which an investor is willing to sell Shares (the "ask" price). This difference in bid and ask prices is often referred to as the "spread" or "bid/ask spread." The bid/ask spread varies over time for Shares based on trading volume and market liquidity, and is generally lower if Shares have more trading volume and market liquidity and higher if Shares have little trading volume and market liquidity. Further, a relatively small investor base in the Fund, asset swings in the Fund and/or increased market volatility may cause increased bid/ask spreads. Due to the costs of buying or selling Shares, including bid/ask spreads, frequent trading of Shares may significantly reduce investment results and an investment in Shares may not be advisable for investors who anticipate regularly making small investments.

Illiquid Investments Risk. The Fund invest primarily in publicly traded securities and do not generally purchase securities that have legal or contractual restrictions on resale or that are illiquid. However, liquid securities purchased by the Fund may become illiquid because of issuer-specific events or changes in market conditions. Illiquid investments are subject to the risk that the Fund will not be able to sell the investments when desired or at favorable prices. The Fund will not purchase an illiquid investment if, as a result, more than 15% of the value of the Fund's net assets would be so invested.

Legal and Regulatory Change Risks. The regulatory environment for investment companies is evolving, and changes in regulation may adversely affect the value of the Fund's investments and its ability to pursue its trading strategy. In addition, the securities markets are subject to comprehensive statutes and regulations. The SEC and other regulators and self-regulatory organizations and exchanges are authorized to take extraordinary actions in the event of market emergencies. The effect of any future regulatory change on the Fund could be substantial and adverse.

RIC Compliance Risk. The Fund intends to elect to be, and intends to qualify each year for treatment as, a RIC under Subchapter M of Subtitle A, Chapter 1, of the Code. To continue to qualify for federal income tax treatment as a RIC, the Fund must meet certain source-of-income, asset diversification and annual distribution requirements. If for any taxable year the Fund fails to qualify for the special federal income tax treatment afforded to RICs, all of the Fund's taxable income will be subject to federal income tax at regular corporate rates (without any deduction for distributions to its shareholders) and its income available for distribution will be reduced. Under certain circumstances, the Fund could cure a failure to qualify as a RIC, but in order to do so, the Fund could incur significant Fund-level taxes and could be forced to dispose of certain assets.

Temporary Investments. The Fund may depart from its principal investment strategy in response to adverse market, economic, political or other conditions by taking a temporary defensive position (up to 100% of its assets) in all types of money market and short-term debt securities. If the Fund were to take a temporary defensive position, it may be unable for a time to achieve its investment objective.

MANAGEMENT OF THE FUND

The Board of the Trust, of which the Fund is a series, is responsible for supervising the operations and affairs of the Fund. The Adviser is responsible for the daily management and administration of the Fund's operations.

Investment Adviser

The Adviser of the Fund is M.D. Sass, LLC, located at 55 West 46th Street, Suite 2801, New York, New York 10036. The Adviser is registered with the SEC as an investment adviser and offers a variety of investment management services. As of December 31, 2025, the Adviser had over \$3.1 billion in assets under management.

Subject to the overall supervision of the Board, the Adviser manages the overall investment operations of the Fund in accordance with the Fund's investment objective and policies and formulates a continuing investment strategy for the Fund pursuant to the terms of an investment advisory agreement between the Trust and the Adviser (the "Advisory Agreement"). Under the terms of the Advisory Agreement, the Fund pays the Adviser a unitary management fee that is computed and paid monthly at an annual rate of 0.75% of the Fund's average daily net assets during the month. From the unitary management fees, the Adviser pays most of the expenses of the Fund, including the cost of sub-advisory fees to any investment sub-adviser, transfer agency, custody, fund administration, legal, audit and other services. However, under the Advisory Agreement, the Adviser is not responsible for interest expenses, brokerage commissions and other trading expenses, taxes and other extraordinary costs such as litigation and other expenses not incurred in the ordinary course of business. No information regarding the advisory fees paid by the Fund is currently available, as the Fund had not commenced operations prior to the date of this Prospectus.

Investment Sub-Adviser

The Trust and the Adviser submitted an application with the SEC for an exemptive order with respect to the Fund that would permit the Adviser to engage or terminate a sub-adviser, and to enter into and materially amend an existing sub-advisory agreement, upon the approval of the Board, without obtaining shareholder approval. This requested exemptive relief has been approved by the Board and the Fund's initial shareholder. Consequently, if approved by the SEC, under the exemptive order, the Adviser would have the right to hire, terminate and replace sub-advisers when the Board and the Adviser feel that a change would benefit the Fund. The exemptive order is expected to enable the Fund to operate with greater efficiency and without incurring the expense and delays associated with obtaining shareholder approval of sub-advisory agreements. There is no guarantee that the SEC will grant the requested exemptive order.

Tidal Investments LLC, a Delaware limited liability company located at 234 West Florida Street, Suite 203, Milwaukee, Wisconsin 53204, serves as the investment sub-adviser to the Fund. The Sub-Adviser is an SEC-registered investment adviser, and as of January 1, 2026, the Sub-Adviser had approximately \$45 billion in assets under management.

The Sub-Adviser is responsible for trading portfolio securities for the Fund, including selecting broker-dealers to execute purchase and sale transactions or in connection with any rebalancing of the Fund, subject to the supervision of the Adviser and the Board. For its services, the Sub-Adviser is entitled to a fee by the Adviser.

A discussion regarding the Board's initial approval of the Fund's Advisory Agreement and Sub-Advisory Agreement and the factors the Board considered with respect to their approval will be available in the Fund's first Form N-CSR, which will be available on the Fund's website and on the SEC's website at www.sec.gov.

Portfolio Managers

Ari Sass, CFA – President & Portfolio Manager - Prior to joining the Adviser in 2004, Mr. Sass was CEO and Co-Founder of Insound, LLC, a media firm founded in 1999 and subsequently sold to Time Warner and private equity. Previously, he was Manager of Finance at Elektra Entertainment Group and held positions at Bear Stearns and Deloitte and Touche. Mr. Sass holds a B.A., Economics from the University of Michigan and an M.B.A. from New York University. Mr. Sass has over 20 years of investment experience.

Martin D. Sass - Chairman & Chief Executive Officer - Before founding the Adviser in 1972, Mr. Sass was President of Neuwirth Management and Research Corp. and founded and directed Argus Research Corp.'s Special Situations Division. Mr. Sass is Vice Chairman of the Brooklyn College Foundation and Chairman of its Investment Committee and Founder of the M.D. Sass Investment Institute. Mr. Sass holds a B.S. in Accounting, Brooklyn College and studied finance in graduate programs at New York University and the Baruch School of Business at C.C.N.Y. Mr. Sass has over 50 years of investment experience.

Craig Barney, CFA - Senior Equity Analyst - Prior to joining the Adviser in 1998, Mr. Barney was an analyst at Morgan Stanley. Mr. Barney holds a B.S., Business Administration, from Villanova University. Mr. Barney has over 24 years of investment experience

William Chiappone, CFA - Equity Analyst - Prior to joining the Adviser in 2020, Mr. Chiappone was an analyst in the middle office group at Bluecrest Capital Management. Mr. Chiappone holds a B.S., Finance, from the University of Maryland (Robert H. Smith School of Business). Mr. Chiappone has over 4 years of investment experience

Eric Ward - Senior Equity Analyst - Prior to joining the Adviser in 2022, Mr. Ward was an investment analyst within the Financials team at LMR Partners, a multi-strategy hedge fund. He was previously the Director of Research at Northern Right Capital, an activist hedge fund. Mr. Wards holds a B.S., Finance and Accounting, from New York University (Leonard N. Stern School of Business) and an M.B.A. from Columbia Business School. Mr. Ward has over 18 years of investment experience.

Shimeng Yu - Senior Equity Analyst - Prior to joining the Adviser in 2025, Ms. Yu was a Senior Analyst at Balyasny Asset Management. She was previously a Research Analyst at ExodusPoint and Point72. Ms. Yu holds a B.S., Mathematics and a B.A., Economics, from the University of Chicago. Ms. Yu has over 13 years of investment experience.

The SAI provides additional information about the compensation of the Portfolio Managers, other accounts managed, and ownership of Shares of the Fund.

HOW TO BUY AND SELL SHARES

The Fund issues and redeems its Shares at NAV only in Creation Units. Only APs may acquire Shares directly from the Fund, and only APs may tender their Shares for redemption directly to the Fund, at NAV. APs must be (i) a broker-dealer or other participant in the clearing process through the Continuous Net Settlement System of the National Securities Clearing Corporation, a clearing agency that is registered with the SEC; or (ii) a Depository Trust Company ("DTC") participant (as discussed below). In addition, each AP must execute a Participant Agreement that has been agreed to by the Distributor, and that has been accepted by the Transfer Agent, with respect to purchases and redemptions of Creation Units. Once created, Shares trade in the secondary market in quantities less than a Creation Unit.

Investors can only buy and sell Shares in secondary market transactions through brokers. Shares are listed for trading on the secondary market on the Exchange and can be bought and sold throughout the trading day like other publicly traded securities.

When buying or selling the Fund's Shares through a broker, you will incur customary brokerage commissions and charges, and you may pay some or all of the spread between the bid and the offer price in the secondary market on each leg of a round trip (purchase and sale) transaction. In addition, because secondary market transactions occur at market prices, you may pay more than NAV when you buy Shares, and receive less than NAV when you sell those Shares.

Book Entry

Shares are held in book-entry form, which means that no stock certificates are issued. The DTC or its nominee is the record owner of all outstanding Shares.

Investors owning the Fund's Shares are beneficial owners as shown on the records of DTC or its participants. DTC serves as the securities depository for all Shares. DTC's participants include securities brokers and dealers, banks, trust companies, clearing corporations and other institutions that directly or indirectly maintain a custodial relationship with DTC. As a beneficial owner of Shares, you are not entitled to receive physical delivery of stock certificates or to have Shares registered in your name, and you are not considered a registered owner of Shares. Therefore, to exercise any right as an owner of Shares, you must rely upon the procedures of DTC and its participants. These procedures are the same as those that apply to any other securities that you hold in book entry or "street name" through your brokerage account.

Share Trading Prices on the Exchange

Trading prices of the Fund's Shares on the Exchange may differ from the Fund's daily NAV. Market forces of supply and demand, economic conditions and other factors may affect the trading prices of Shares. To provide additional information regarding the indicative value of Shares, the Exchange or a market data vendor disseminates information every 15 seconds through the facilities of the Consolidated Tape Association, or other widely disseminated means, an updated "intraday indicative value" ("IIV") for Shares as calculated by an information provider or market data vendor. The Funds are neither involved in nor responsible for any aspect of the calculation or dissemination of the IIVs and make no representation or warranty as to the accuracy of the IIVs. If the calculation of the IIV is based on the basket of Deposit Securities, such IIV may not represent the best possible valuation of the Fund's portfolio because the basket of Deposit Securities does not necessarily reflect the precise composition of the current Fund portfolio at a particular point in time. The IIV should not be viewed as a "real-time" update of the Fund's NAV because the IIV may not be calculated in the same manner as the NAV, which is computed only once a day, typically at the end of the business day. The IIV is generally determined by using both current market quotations and/or price quotations obtained from broker-dealers that may trade in the Deposit Securities.

Frequent Purchases and Redemptions of Shares

The Fund imposes no restrictions on the frequency of purchases and redemptions of Shares. In determining not to approve a written, established policy, the Board evaluated the risks of market timing activities by Fund shareholders. Purchases and redemptions by APs, who are the only parties that may purchase or redeem Shares directly with the Fund, are an essential part of the ETF process and help keep share trading prices in line with NAV. As such, the Fund accommodate frequent purchases and redemptions by APs. However, the Board has also determined that frequent purchases and redemptions for cash may increase tracking error and portfolio transaction costs and may lead to the realization of capital gains or losses. To minimize these potential consequences of frequent purchases and redemptions, the Fund employs fair value pricing and impose transaction fees on purchases and redemptions of Creation Units to cover the custodial and other costs incurred by the Fund in effecting trades. In addition, the Fund reserves the right to reject any purchase order at any time.

Determination of Net Asset Value

The Fund's NAV is calculated as of the scheduled close of regular trading on the New York Stock Exchange ("NYSE"), generally 4:00 p.m. Eastern Time, each day the NYSE is open for business. The NAV for the Fund is calculated by dividing the Fund's net assets by its Shares outstanding.

In calculating its NAV, the Fund generally values its assets on the basis of market quotations, last sale prices, or estimates of value furnished by a pricing service or brokers who make markets in such instruments. If such information is not available for a security held by the Fund or is determined to be unreliable, the security will be valued at fair value estimates by the Fund's Valuation Designee (defined below) under guidelines established by the Board.

Fair Value Pricing

If market quotations are unavailable or deemed unreliable, securities will be fair valued by the Adviser, as the Fund's Valuation Designee (the "Valuation Designee"), in accordance with procedures adopted by the Board and under the Board's ultimate supervision. Relying on prices supplied by pricing services or dealers or using fair valuation involves the risk that the values used by the Fund to price its investments may be higher or lower than the values used by other investment companies and investors to price the same investments. The Board has adopted a pricing and valuation policy for use by the Fund and its Valuation Designee in calculating the Fund's NAV. Pursuant to Rule 2a-5 under the Investment Company Act of 1940, as amended (the "1940 Act"), the Fund has designated the Adviser as its "Valuation Designee" to perform all of the fair value determinations as well as to perform all of the responsibilities that may be performed by the Valuation Designee in accordance with Rule 2a-5. The Valuation Designee is authorized to make all necessary determinations of the fair values of portfolio securities and other assets for which market quotations are not readily available or if it is deemed that the prices obtained from brokers and dealers or independent pricing services are unreliable.

DIVIDENDS, DISTRIBUTIONS, AND TAXES

Dividends and Distributions

The Fund intends to pay out dividends, if any, annually, and distribute any net realized capital gains to its shareholders at least annually.

Dividend Reinvestment Service

Brokers may make the DTC book-entry dividend reinvestment service available to their customers who own Shares. If this service is available and used, dividend distributions of both income and capital gains will automatically be reinvested in additional whole Shares of the Fund purchased on the secondary market. Without this service, investors would receive their distributions in cash. In order to achieve the maximum total return on their investments, investors are encouraged to use the dividend reinvestment service. To determine whether the dividend reinvestment service is available and whether there is a commission or other charge for using this service, consult your broker. Brokers may require the Fund's shareholders to adhere to specific procedures and timetables.

For taxable investors, distributions of the Fund's taxable income or gain are taxable whether reinvested in Shares or received in cash.

Taxes

The Fund intends to elect to be, and intends to qualify each year for treatment as, a RIC under Subchapter M of Subtitle A, Chapter 1, of the Code.

As with any investment, you should consider how your investment in shares of the Fund will be taxed. The tax information in this Prospectus is provided as general information about certain U.S. tax considerations relevant under current law, which may be subject to change in the future. Such tax information does not represent a detailed description of the U.S. federal income tax consequences to you in light of your particular circumstances, including if you are subject to special tax treatment. Except where otherwise indicated, the discussion relates to investors who are individual "United States persons" (within the meaning of the Code) holding Shares as capital assets for U.S. federal income tax purposes (generally, for investment). You should consult your own tax professional about the tax consequences of an investment in shares of the Fund.

Unless your investment in shares of the Fund is made through a tax-exempt entity or tax-advantaged account, such as an IRA plan, you need to be aware of the possible tax consequences when: (i) the Fund makes distributions; (ii) you sell your shares listed on the Exchange; and (iii) you purchase or redeem Creation Units.

Taxes on Distributions

The Fund intends to distribute, at least annually, substantially all of its net investment income, and at least annually net capital gains income. For federal income tax purposes, distributions of investment income are generally taxable as ordinary income or qualified dividend income (as defined below). Taxes on distributions of capital gains (if any) are determined by how long the Fund owned the investments that generated them, rather than how long a shareholder has owned his or her shares of the Fund. Sales of assets held by the Fund for more than one year generally result in long-term capital gains and losses, and sales of assets held by the Fund for one year or less generally result in short-term capital gains and losses. Distributions of the Fund's net capital gain (the excess of net long-term capital gains over net short-term capital losses) that are reported by the Fund as capital gain dividends ("Capital Gain Dividends") will be taxable as long-term capital gains, which for non-corporate shareholders are subject to tax at reduced rates. Distributions of short-term capital gain will generally be taxable as ordinary income. Dividends and distributions are generally taxable to you whether you receive them in cash or reinvest them in additional Shares of the Fund.

Distributions reported by the Fund as "qualified dividend income" are generally taxed to non-corporate shareholders at rates applicable to long-term capital gains, provided holding period and other requirements are met by both the Fund and the shareholder. "Qualified dividend income" generally is income derived from dividends paid by U.S. corporations or certain foreign corporations that are either incorporated in a U.S. possession or eligible for tax benefits under certain U.S. income tax treaties. In addition, dividends that the Fund receives in respect of stock of certain foreign corporations may be qualified dividend income if that stock is readily tradable on an established U.S. securities market. The amount of the Fund's distributions that qualify for this favorable treatment may be reduced as a result of the Fund's securities lending activities, if any. Corporate shareholders may be entitled to a dividends-received deduction for the portion of dividends they receive from the Fund that are attributable to dividends received by the Fund from U.S. corporations, provided holding period and other requirements are met by both the Fund and the shareholder. The amount of the dividends qualifying for this deduction may, however, be reduced as a result of the Fund's securities lending activities, if any.

If the Fund were to retain any net capital gain, the Fund may designate the retained amount as undistributed capital gains in a notice to shareholders who, if subject to U.S. federal income tax on long-term capital gains, (i) will be required to include in income as long-term capital gain, their proportionate share of such undistributed amount, and (ii) will be entitled to credit their proportionate share of the U.S. federal income tax paid by the Fund on the undistributed amount against their U.S. federal income tax liabilities, if any, and to claim refunds to the extent the credit exceeds such liabilities. If such an event occurs, the tax basis of Shares owned by a shareholder of the Fund will, for U.S. federal income tax purposes, generally be increased by the difference between the amount of undistributed net capital gain included in the shareholder's gross income and the tax deemed paid by the shareholder.

The Fund may make distributions that are treated as a return of capital. Such distributions are generally not taxable but will reduce the basis of your Shares. To the extent that the amount of any such distribution exceeds the basis of your Shares, however, the excess will be treated as gain from a sale of the Shares.

Shortly after the close of each calendar year, you will be informed of the character of any distributions received from the Fund.

U.S. individuals with income exceeding specified thresholds are subject to a 3.8% Medicare contribution tax on all or a portion of their "net investment income," which includes interest, dividends, and certain capital gains (including capital gains distributions and capital gains realized on the sale of shares of the Fund). This 3.8% tax also applies to all or a portion of the undistributed net investment income of certain shareholders that are estates and trusts.

In general, your distributions are subject to federal income tax for the year in which they are paid. Certain distributions paid in January, however, may be treated as paid on December 31 of the prior year. Distributions are generally taxable even if they are paid from income or gains earned by the Fund before your investment (and thus were included in the shares' NAV when you purchased your shares of the Fund). Income from U.S. treasury securities are generally exempt from state and local taxes. Distributions paid from any interest income and from any short-term or long-term capital gains will be taxable whether you reinvest those distributions or receive them in cash. Distributions paid from the Fund's net long-term capital gains, if any, are taxable to you as long-term capital gains, regardless of how long you have held your Shares.

You may wish to avoid investing in the Fund shortly before a dividend or other distribution, because such a distribution will generally be taxable to you even though it may economically represent a return of a portion of your investment. This adverse tax result is known as "buying into a dividend."

Taxes When Shares are Sold on the Exchange

For federal income tax purposes, any capital gain or loss realized upon a sale of shares of the Fund generally is treated as a long-term capital gain or loss if those shares have been held for more than 12 months and as a short-term capital gain or loss if those shares have been held for 12 months or less. However, any capital loss on a sale of shares held for six months or less is treated as long-term capital loss to the extent of Capital Gain Dividends paid with respect to such shares of the Fund. Any loss realized on a sale will be disallowed to the extent shares of the Fund are acquired, including through reinvestment of dividends, within a 61-day period beginning 30 days before and ending 30 days after the sale of shares. If disallowed, the loss will be reflected in an upward adjustment to the basis of the shares acquired.

IRAs and Other Tax-Qualified Plans

The one major exception to the preceding tax principles is that distributions on and sales of shares of the Fund held in an IRA (or other tax-qualified plan) will not be currently taxable unless it borrowed to acquire the shares.

U.S. Tax Treatment of Foreign Shareholders

If you are neither a resident nor a citizen of the United States or if you are a foreign entity, distributions (other than Capital Gain Dividends or returns of capital) paid to you by the Fund will generally be subject to a U.S. withholding tax at the rate of 30%, unless a lower treaty rate applies. The Fund may, under certain circumstances, report all or a portion of a dividend as an "interest-related dividend" or a "short-term capital gain dividend," which would generally be exempt from this 30% U.S. withholding tax, provided certain other requirements are met. For these purposes, interest-related dividends and short-term capital gain dividends generally represent distributions of interest or short-term capital gains that would not have been subject to U.S. federal withholding tax at the source if received directly by a foreign shareholder, and that satisfy certain other requirements.

Properly reported distributions by the Fund that are received by foreign shareholders are generally exempt from U.S. federal withholding tax when they (a) are paid by the Fund in respect of the Fund's "qualified net interest income" (i.e., the Fund's U.S. source interest income, subject to certain exceptions, reduced by expenses that are allocable to such income), or (b) are paid by the Fund in connection with the Fund's "qualified short-term gains" (generally, the excess of the Fund's net short-term capital gains over the Fund's long-term capital losses for such tax year). However, depending on the circumstances, the Fund may report all, some or none of the Fund's potentially eligible distributions as derived from such qualified net interest income or from such qualified short-term gains, and a portion of such distributions (e.g., distributions attributable to interest from non-U.S. sources or any foreign currency gains) would be ineligible for this potential exemption from withholding.

If the Fund were to retain any net capital gain and designate the retained amount as undistributed capital gains in a notice to shareholders, foreign shareholders would be required to file a U.S. federal income tax return in order to claim refunds of their portion of the tax paid by the Fund on deemed capital gain distributions.

Foreign shareholders will generally not be subject to U.S. tax on gains realized on the sale of shares in the Fund, except that a nonresident alien individual who is present in the United States for 183 days or more in a calendar year will be taxable on such gains and on capital gain dividends from the Fund.

However, if a foreign investor conducts a trade or business in the United States and the investment in the Fund is effectively connected with that trade or business, then the foreign investor's income from the Fund will generally be subject to U.S. federal income tax at graduated rates in a manner similar to the income of a U.S. citizen or resident.

The Fund is generally required to withhold 30% on certain payments to shareholders that are foreign entities and that fail to meet prescribed information reporting or certification requirements.

The tax consequences to a foreign shareholder entitled to claim the benefits of an applicable tax treaty may differ from those described herein. All foreign investors should consult their own tax advisors regarding the tax consequences in their country of residence of an investment in the Fund.

Backup Withholding

The Fund (or a financial intermediary, such as a broker, through which a shareholder owns shares of the Fund) generally is required to withhold and remit to the U.S. Treasury a percentage of the taxable distributions and sale or redemption proceeds paid to any shareholder who fails to properly furnish a correct taxpayer identification number, who has underreported dividend or interest income, or who fails to certify that he, she or it is not subject to such backup withholding. The current backup withholding rate is 24%.

Taxes on Purchases and Redemptions of Creation Units

An AP who exchanges securities for Creation Units generally recognizes a capital gain or a loss. The gain or loss will be equal to the difference between the market value of the Creation Units at the time of the exchange and the sum of the AP's aggregate basis in the securities surrendered plus the amount of cash, if any, paid for such Creation Units. The Internal Revenue Service ("IRS"), however, may assert that a loss realized upon an exchange of securities for Creation Units cannot be deducted currently under the rules governing "wash sales," or on the basis that there has been no significant change in economic position. Any gain or loss realized by an AP upon a creation of Creation Units will be treated as capital gain or loss if the AP holds the securities exchanged therefor as capital assets, and otherwise will be ordinary income or loss. Any capital gain or loss realized upon the creation of Creation Units will generally be treated as long-term capital gain or loss if the securities exchanged for such Creation Units have been held by the AP for more than 12 months, and otherwise will be short-term capital gain or loss.

The Trust on behalf of the Fund has the right to reject an order for a purchase of Creation Units if the AP (or a group of APs) would, upon obtaining the Creation Units so ordered, own 80% or more of the outstanding shares of the Fund and if, pursuant to Section 351 of the Code, the Fund would have a basis in the securities different from the market value of such securities on the date of deposit. The Trust also has the right to require information necessary to determine beneficial share ownership for purposes of the 80% determination. If the Fund does issue Creation Units to an AP (or group of APs) that would, upon obtaining the Creation Units so ordered, own 80% or more of the outstanding shares of the Fund, the AP (or group of APs) may not recognize gain or loss upon the exchange of securities for Creation Units.

An AP who redeems Creation Units will generally recognize a gain or loss equal to the difference between the sum of the aggregate market value of any securities received plus the amount of any cash received for such Creation Units and the AP's basis in the Creation Units. Any gain or loss realized by an AP upon a redemption of Creation Units will be treated as capital gain or loss if the AP holds the shares comprising the Creation Units as capital assets, and otherwise will be ordinary income or loss. Any capital gain or loss realized upon the redemption of Creation Units will generally be treated as long-term capital gain or loss if the shares comprising the Creation Units have been held by the AP for more than 12 months, and otherwise will generally be short-term capital gain or loss. Any capital loss realized upon a redemption of Creation Units held for six months or less will be treated as a long-term capital loss to the extent of any amounts treated as distributions to the applicable AP of long-term capital gains with respect to the Creation Units (including any amounts credited to the AP as undistributed capital gains). However, any loss realized upon a redemption of Creation Units will be disallowed to the extent Shares of the Fund are acquired (or the AP enters into a contract or option to acquire Shares of the Fund), including through reinvestment of dividends, within a 61-day period beginning 30 days before and ending 30 days after the redemption. If disallowed, the loss will be reflected in an increase to the basis of the Shares acquired.

The Fund may include a payment of cash in addition to, or in place of, the delivery of a basket of securities upon the redemption of Creation Units. The Fund may sell portfolio securities to obtain the cash needed to distribute redemption proceeds. This may cause the Fund to recognize investment income and/or capital gains or losses that it might not have recognized if it had completely satisfied the redemption in-kind. As a result, the Fund may be less tax efficient if it includes such a cash payment in the proceeds paid upon the redemption of Creation Units.

Persons purchasing or redeeming Creation Units should consult their own tax advisers with respect to the tax treatment of any creation or redemption transaction.

The foregoing discussion summarizes some of the possible consequences under current federal tax law of an investment in the Fund. It is not a substitute for personal tax advice. You also may be subject to state and local tax on Fund distributions and sales of shares of the Fund. Consult your personal tax advisor about the potential tax consequences of an investment in Shares of the Fund under all applicable tax laws. For more information, please see the section entitled "DIVIDENDS, DISTRIBUTIONS, AND TAXES" in the SAI.

DISTRIBUTION

The Distributor, Quasar Distributors, LLC, a wholly-owned subsidiary of Foreside Financial Group, LLC (d/b/a ACA Group) (the "Distributor"), is a broker-dealer registered with the SEC. The Distributor distributes Creation Units for the Fund on an agency basis and does not maintain a secondary market in Shares. The Distributor has no role in determining the policies of the Fund or the securities that are purchased or sold by the Fund. The Distributor's principal address is 190 Middle Street, Suite 301, Portland, Maine 04101.

ADDITIONAL CONSIDERATIONS

Payments to Financial Intermediaries

The Adviser, out of its own resources and without additional cost to the Fund or its shareholders, may pay intermediaries, including affiliates of the Adviser, for the sale of Fund Shares and related services, including participation in activities that are designed to make intermediaries more knowledgeable about exchange traded products. Payments are generally made to intermediaries that provide shareholder servicing, marketing and related sales support, educational training or support, or access to sales meetings, sales representatives and management representatives of the intermediary. Payments may also be made to intermediaries for making Shares of the Fund available to their customers generally and in investment programs. The Adviser may also reimburse expenses or make payments from its own resources to intermediaries in consideration of services or other activities the Adviser believes may facilitate investment in the Fund.

The possibility of receiving, or the receipt of, the payments described above may provide intermediaries or their salespersons with an incentive to favor sales of Shares of the Fund, and other funds whose affiliates make similar compensation available, over other investments that do not make such payments. Investors may wish to take such payment arrangements into account when considering and evaluating any recommendations relating to the Fund and other ETFs.

Premium/Discount Information

The Fund is new and therefore does not have any information regarding how often Shares are traded on the Exchange at a price above (*i.e.*, at a premium) or below (*i.e.*, at a discount) the NAV of the Fund. Once available, this information will be presented, free of charge, on the Fund's website at www.MDSassETF.com.

Continuous Offering

The method by which Creation Units are purchased and traded may raise certain issues under applicable securities laws. Because new Creation Units are issued and sold by the Fund on an ongoing basis, at any point a "distribution," as such term is used in the Securities Act of 1933, as amended (the "Securities Act"), may occur. Broker-dealers and other persons are cautioned that some activities on their part may, depending on the circumstances, result in their being deemed participants in a distribution in a manner which could render them statutory underwriters and subject them to the Prospectus delivery and liability provisions of the Securities Act.

For example, a broker-dealer firm or its client may be deemed a statutory underwriter if it takes Creation Units after placing an order with the transfer agent, breaks them down into individual Shares, and sells such Shares directly to customers, or if it chooses to couple the creation of a supply of new Shares with an active selling effort involving solicitation of secondary market demand for Shares. A determination of whether one is an underwriter for purposes of the Securities Act must take into account all the facts and circumstances pertaining to the activities of the broker-dealer or its client in the particular case, and the examples mentioned above should not be considered a complete description of all the activities that could lead to categorization as an underwriter.

Broker-dealer firms should also note that dealers who are not "underwriters" but are effecting transactions in Shares, whether or not participating in the distribution of Shares, are generally required to deliver a prospectus. This is because the prospectus delivery exemption in Section 4(a)(3) of the Securities Act is not available with respect to such transactions as a result of Section 24(d) of the 1940 Act. As a result, broker-dealer-firms should note that dealers who are not underwriters but are participating in a distribution (as contrasted with ordinary secondary market transactions) and thus dealing with Shares that are part of an over-allotment within the meaning of Section 4(a)(3)(a) of the Securities Act would be unable to take advantage of the prospectus delivery exemption provided by Section 4(a)(3) of the Securities Act. Firms that incur a prospectus delivery obligation with respect to Shares of the Fund are reminded that under Rule 153 of the Securities Act, a prospectus delivery obligation under Section 5(b)(2) of the Securities Act owed to an exchange member in connection with a sale on the Exchange is satisfied by the fact that the Fund's Prospectus is available on the SEC's electronic filing system. The prospectus delivery mechanism provided in Rule 153 of the Securities Act is only available with respect to transactions on an exchange.

Disclosure of Portfolio Holdings

The Fund discloses its full portfolio holdings, as of the close of business the prior day, each day before the opening of trading on the Exchange at www.MDSassETF.com. Once available, additional information, including information regarding the Fund's NAV, market price, premiums and discounts, and bid/ask spreads, will be available at www.MDSassETF.com. A description of the Fund's policies and procedures with respect to the disclosure of the Fund's portfolio securities is available in the Fund's SAI.

Additional Information

The Fund enters into contractual arrangements with various parties, including, among others, the Fund's investment adviser and investment sub-adviser, who provide services to the Fund. Shareholders are not parties to, or intended (or "third party") beneficiaries of, those contractual arrangements.

The Prospectus and the SAI provide information concerning the Fund that you should consider in determining whether to purchase Shares of the Fund. The Fund may make changes to this information from time to time. Neither this Prospectus nor the SAI is intended to give rise to any contract rights or other rights in any shareholder, other than any rights conferred explicitly by federal or state securities laws that may not be waived.

Shareholder Rights

The Trust's Amended and Restated Agreement and Declaration of Trust requires shareholders bringing a derivative action on behalf of the Fund to first make a pre-suit demand and also to collectively hold at least 10% of the outstanding shares of the Trust or at least 10% of the outstanding shares of the series or class to which the demand relates and to undertake to reimburse the Trust for the expense of any counsel or advisors used when considering the merits of the demand in the event that the Board of Trustees determines not to bring such action. Following receipt of the demand, the Trustees must be afforded a reasonable amount of time to investigate and consider the demand. In each case, these requirements do not apply to claims arising under the federal securities laws.

Duties of Trustees

The Trust's Amended and Restated Agreement and Declaration of Trust provides that the Fund's Trustees are subject to the same fiduciary duties to which the directors of a Delaware corporation would be subject if (i) the Trust were a Delaware corporation, (ii) the Shareholders were shareholders of such Delaware corporation, and (iii) the Trustees were directors of such Delaware corporation, and that such modified duties are instead of any fiduciary duties to which the Trustees would otherwise be subject. Without limiting the generality of the foregoing, all actions and omissions of the Trustees are evaluated under the doctrine commonly referred to as the "business judgment rule," as defined and developed under Delaware law, to the same extent that the same actions or omissions of directors of a Delaware corporation in a substantially similar circumstance would be evaluated under such doctrine. Notwithstanding the foregoing, the provisions of the Fund's Amended and Restated Agreement and Declaration of Trust and its By-Laws, to the extent that they restrict or eliminate the duties (including fiduciary duties) and liabilities relating thereto of a Trustee otherwise applicable under the foregoing standard or otherwise existing at law or in equity, replace such other duties and liabilities of such Trustee. In addition, nothing in the Fund's Agreement and Declaration of Trust modifying, restricting or eliminating the duties or liabilities of Trustees shall apply to, or in any way limit, the duties (including state law fiduciary duties of loyalty and care) or liabilities of such persons with respect to matters arising under the federal securities laws.

NO PERSON HAS BEEN AUTHORIZED TO GIVE ANY INFORMATION OR MAKE ANY REPRESENTATIONS NOT CONTAINED IN THIS PROSPECTUS OR IN THE FUND'S SAI INCORPORATED HEREIN BY REFERENCE, IN CONNECTION WITH THE OFFERING MADE BY THIS PROSPECTUS AND, IF GIVEN OR MADE, SUCH REPRESENTATIONS MUST NOT BE RELIED UPON AS HAVING BEEN AUTHORIZED BY THE TRUST OR ITS DISTRIBUTOR. THIS PROSPECTUS DOES NOT CONSTITUTE AN OFFERING BY THE TRUST OR BY THE DISTRIBUTOR IN ANY JURISDICTION IN WHICH SUCH OFFERING MAY NOT LAWFULLY BE MADE.

FINANCIAL HIGHLIGHTS

Financial highlights are not yet available for the Fund as it had not commenced operations prior to the date of this Prospectus.

APPENDIX

Prior Performance of Similarly Advised Accounts of the Adviser

The Adviser has experience in managing other accounts with substantially similar investment objectives, policies and strategies as the Fund. The tables on the following pages are provided to illustrate the past performance of the Adviser in managing a composite of such other accounts and does not represent the performance of the Fund. Investors should not consider this performance information as a substitute for the performance of the Fund, nor should investors consider this information as an indication of the future performance of the Fund or of the Adviser. The performance information has been adjusted to show the net of fee performance of each account within the composite. The other accounts' fees and expenses are generally lower than those of the Fund. The Fund's results in the future also may be different because the other accounts are not subject to certain investment limitations, diversification requirements and other restrictions imposed on mutual funds under applicable U.S. securities and tax laws that, if applicable, could have adversely affected the performance of the other accounts. In addition, the securities held by the Fund will not be identical to the securities held by the other accounts.

The performance of the other accounts is also compared to the performance of an appropriate broad-based securities benchmark index. The index is unmanaged and is not subject to fees and expenses typically associated with managed funds, including the Fund. Investors cannot invest directly in an index. The performance information is accompanied by additional disclosures, which are an integral part of the information.

SUMMARY STATISTICS (periods ended December 31, 2025)^{1, 2, 3, 4}

	1 Year	5 Years	10 Years	Since Inception
Gross of Fees	19.17%	14.84%	—	17.37%
Net of Fees	18.80%	14.33%	—	16.82%
Russell 1000 Value	15.91%	11.33%	—	12.09%

1. The method of calculating performance differs from the SEC's standardized methodology, which may produce different results.
2. Performance was calculated using a net asset value to net asset value methodology which incorporates all trades, prices, accruals and updated security records on trade date basis.
3. Performance is presented gross and net of the Composite's annual operating expenses through December 31, 2025.
4. The Russell 1000 Value Index is a market-capitalization-weighted index that measures the performance of the large-cap value segment of the U.S. equity universe. It includes those Russell 1000 companies with lower price-to-book ratios and lower historical and expected sales growth values.

FOR MORE INFORMATION

For more information about the Fund, the following documents are available free upon request:

Annual/Semi-Annual Reports

Once available, additional information about the Fund's investments will be included in the Fund's annual and semi-annual reports to shareholders. The annual report will contain a concise summary of the relevant market conditions and investment strategies that materially affected the Fund's performance during its most recently completed fiscal year. The Fund's annual and semi-annual reports to shareholders will be available at the Fund's website at www.MDSassETF.com. or by calling 1-800-617-0004.

Statement of Additional Information

The Fund's SAI, dated February 4, 2026, has been filed with the SEC. The SAI, which includes additional information about the Fund, may be obtained free of charge at the Fund's website or by calling 800-617-0004. The SAI, as supplemented from time to time, is incorporated by reference into this Prospectus and is legally considered a part of this Prospectus.

TO OBTAIN INFORMATION

The SAI is available, without charge, upon request along with the semi-annual and annual reports (when available). To obtain a free copy of the SAI, semi-annual or annual reports or if you have questions about the Fund:

By Internet

Go to www.MDSassETF.com.

By Telephone

Call 1-800-617-0004 or your securities dealer.

From the SEC

Information about the Fund (including the SAI) and other information about the Fund are available on the EDGAR Database on the SEC's Internet site at www.sec.gov, and copies of this information may be obtained, after paying a duplicating fee, by sending an electronic request to publicinfo@sec.gov.

Investment Company Act File Number 811-23011
